width: 410 cm
length: 410 cm
ridge height: 250/160 cm
side height: 60 cm

WEIGHT

canvas (bag/packaging): 21.8 kg
frame: 6 kg
accessories: 2 kg

FULL TRANSPORT BAGS

DIMENSIONS (VOLUME)

canvas + frame: 1 pcs, ø 40 × 80 cm (0.1 m³)
accessories: 1 pcs, ø 20 × 120 cm (0.037 m³)

LIVING AREA

16.8 m²

TOTAL WEIGHT

29.3 kg

ACCOMMODATION FOR

12 persons

TENT CODE

300/208

COLOUR CHART

- A product with tradition
- Selection of quality input materials that provide a favourable climate in the room
- 5-year warranty
- Slovenian product
- 100% sustainable product

PERSIA is a **multi-purpose group tent** comfortable for the whole family and at the same time suitable for garden fun.

It has a removable bottom made of durable PE fabric, which also serves as a tent packing bag. Due to the fabrics used, the tent is bright and airy in itself, and the large entrance door with the large window on the opposite side further increases the feeling of airiness. The climate in the tent is therefore extremely pleasant. The entire tent is mounted on a composite central pole and two side poles, while the sides are held in shape by four corner poles. The sides of the tent are liftable, which means that the tent **can be used in three versions**, as:

- a usual group tent,
- with raised sides to increase the airiness of the room,
- an aesthetic canopy/sunshade with a large surface with the bottom removed.

TENT MAINTENANCE AND CLEANING

Brush the canvas parts and, if necessary, wash them with a jet of water. **Use only a softer brush.** Spread out the tent and let it dry. Wash the frame and let it dry. Canvas parts, frame parts, and accessories should be packed and stored exclusively completely dry.

Machine washing, dry-cleaning, bleaching, tumble drying or ironing of canvases is not allowed. Tears and other damage to the outer canvas should be repaired by the manufacturer.

TECHNICAL DOCUMENTATION

The tent is manufactured in accordance with the Prestandard SIS EN-1999-1-1, Eurocode pt. 9. Technical documentation and static assessment are created in accordance with the first indent of Article 5 of the Mechanical Resistance And Stability of Construction Works (Official Gazette of RS No. 101/2005).
