## COLOUR CHART

# tent characteristics and usage

- A product with tradition
- Selection of quality input materials that provide a favourable climate in the room
- 5-year warranty
- Slovenian product
- 100% sustainable product

The traditional scout canvas tent **BOHINJ** is distinguished by a modern design. It has been developed at the request and in accordance with the needs and proposals of scouts, elders of Slovenian scout families, and the *Scout Association of Slovenia*.

**Custom canvas production is also a unique opportunity for glamping tents where we adapt to your wishes.**

\* We present an example of good practice where the **trough and the ridge are made of wood**. A canvas part is hung on an upright wooden structure. The tent is thus completely protected from external influences (sun, rain, etc.) and offers increased comfort in the interior. The canvas is made of TenCate cotton fabric with excellent properties of ventilation and humidity regulation. It ensures a pleasant climate in the tent and is resistant to all weather conditions.

## TENT MAINTENANCE AND CLEANING

Brush the canvas parts and, if necessary, wash them with a jet of water. **Use only a softer brush**. Spread out the tent and let it dry. Wash the frame and let it dry. Canvas parts, frame parts, and accessories should be packed and stored exclusively completely dry.

**Machine washing, dry-cleaning, bleaching, tumble drying or ironing of canvases is not allowed.** Tears and other damage to the outer canvas should be repaired by the manufacturer.

**WATER-REPELLENT**
