COLOUR CHART

tent characteristics and usage

- A product with tradition
- Selection of quality input materials that provide a favourable climate in the room
- 5-year warranty
- Slovenian product
- 100% sustainable product

The traditional scout canvas tent **SKAVT** is distinguished by a modern design. It was developed in cooperation with *Slovenian Catholic Girl Guides and Boy Scouts Association* and is based on *Jamboree* and *Brownsea* tent models.

The tent is equipped with strong pegs and a frame with pins. The inner tent is made of lightweight and breathable PES fabric. The outer roof is made of TenCate cotton fabric with excellent properties of ventilation and humidity regulation. It ensures a pleasant climate in the tent and is resistant to all weather conditions. **The double roof contributes to the comfortable atmosphere in the tent.** Between the additional outer roof and the roof of the inner tent is an insulating area (air bridge), which prevents the passage of heat into the living space. **The outer roof increases the usable floor plan by more than 10 m².** There is a small canopy in front of the tent, which protects against the weather (sun, rain, etc.), and helps to cool the interior. On the other side, the outer roof covers the surface of a larger semicircle, which can be closed completely if necessary.

TENT MAINTENANCE AND CLEANING

Brush the canvas parts and, if necessary, wash them with a jet of water. **Use only a softer brush.** Spread out the tent and let it dry. Wash the frame and let it dry. Canvas parts, frame parts, and accessories should be packed and stored exclusively completely dry.

Machine washing, dry-cleaning, bleaching, tumble drying or ironing of canvases is not allowed. Tears and other damage to the outer canvas should be repaired by the manufacturer.
